

Licence Round, Unitisation and General Geoscience Experience

Members of Calderdale Geoscience (CGL), a UK-based geosciences consultancy established in 2004, have contributed to a number of licence round applications over the past 30 years, and have taken part in a significant number of equity redeterminations. Some areas of CGL's world-wide experience are presented on the map below, which also illustrates the level of CGL experience by country:

-  Basins studied by CGL during Licensing Rounds
-  Countries where CGL has worked on Equity Redeterminations
-  Countries where CGL has significant experience.
-  Countries where CGL has moderate experience.
-  Countries where CGL has some experience.
